AMC WILL BE AT THE 2017 IPI

CONTACT BERNIE AT (406) 431-9514 OR BERNIE@AMC-HLN.COM TO SCHEDULE A MEETING

Successful Integrations

We are proud to announce that we have completed several successful integrations this past year.

Data Mining
Integration with Smarking and Parkloco to mine data, including transient financial transactions, credential access cards, and ticket information.

Reservation Systems
Reservation system integrations with Gateway and the Georgia Aquarium.

Data Import and Export
Extract data from ScanNet and EFMS in any format to import into your new parking system. We have developed import programs for several manufacturers.

University Systems
Completed CS Gold and Blackboard interfaces.

Pay-By-App
Assisted with integrating a smart device pay-by-app with a parking system with Arriv.io and IONET.

Count Data
Count data to feed Super Park in St. Louis.

Hotel Interface System

The solution for integrating your parking system to your front desk software and key encoding system. It's a background monitor that's transparent to guest services that seamlessly allows the guest to use the same key for room & parking access throughout the duration of stay.

Current Options
Fully integrated system, stand-alone system, and event keycard system.

Certified Interfaces
We have certified interfaces with Marriott, Galaxy , O (Opera) and Agilysys . In addition we support Saflok, VingCard , TIMELOX and Ilco, as well as Magstripe including Onity key card systems.

Integrations
Compatible with EFMS, ScanNet, and other manufacturers.

ScanNet Support
We continue to offer support for your ScanNet programs.

Technical Notes

Ending Support for Windows Vista
Windows is ending its support for Vista in April 2017. This means there will no longer be Windows updates for any computer with a Vista operating system.
